---

Attention all AP parents and students. Your students have been advised that they will have a choice in how they take their AP exam(s) this school year. One version will be pencil/paper in person, and we anticipate offering the in person testing at REV. Those exams with low requests for in person testing may be combined to a single site which could be RHS or CVHS. The other option is to take the exam digitally, at home. There will be a survey that your students will be asked to complete through their AP class(es) to indicate their preference. Within the survey, your student will be asked to select “At school-paper/pencil”, OR “At home digital”. This survey will need to be completed in class by March 3, 2021. AP teachers have shared with your student information regarding the differences between the different testing formats.

Social distancing guidelines will be followed, and students will have to wear a mask for the duration of the exam(s).

\*PLEASE encourage your student to get a school issued Chromebook prior to taking any AP exam as it will have the necessary software.
